Background and Methodology

Patrick E. Gonzales graduated magna cum laude from the University of Baltimore with a degree in political science.

His career began in the mid 1980s as an analyst with Mason-Dixon Opinion Research. Mr. Gonzales helped develop, craft and implement election surveys and exit polls for Baltimore's WMAR-TV Channel 2.

Patrick Gonzales has polled and analyzed well over a thousand elections in Maryland and across the country since that time. His polling in the 2014 Maryland gubernatorial election foreshadowed Larry Hogan's victory on Election Day.

During an interview at WBAL 1090 AM radio in Baltimore, Maryland on October 27, 2016, Mr. Gonzales was one of the very few pollsters in the nation to state publicly that Donald Trump would win the 2016 presidential election.

This poll was conducted by ***Gonzales Research & Media Services*** from June 4th through June 10th, 2018. A total of 800 registered voters in Maryland, who indicated that they are likely to vote in the November 2018 general election, were queried by live telephone interviews, utilizing both landline and cell phone numbers. A cross-section of interviews was conducted throughout the state, reflecting general election voting patterns.

The margin of error (MOE), per accepted statistical standards, is a range of plus or minus 3.5 percentage points. If the entire population was surveyed, there is a 95% probability that the true numbers would fall within this range.

An oversample of 505 registered Democrats in Maryland, who indicated that they are likely to vote in the June 2018 primary election, were also interviewed by live telephone. MOE for this group is plus or minus 4.5 percentage points.

Executive Summary

Democratic Primary

The President's on the other side of the globe striving for world peace (or, at the very least, a skosh of regional stability), but he's front and center in the minds of Maryland Democrats who are getting ready to select a nominee to challenge a popular governor.

When asked to pick the most important issue for them in the primary that begins Thursday, 46% say that "removing Donald Trump from office" is the number one issue. Getting rid of the President is followed by "public education (26%), "the economy and jobs (10%), "crime, public safety & law enforcement" (8%), and "the opioid epidemic" (3%).

A majority of voters age 35-54 say that removing Trump is the principal stimulus for them (51%); as do 50% of African-Americans and 52% of voters in the Washington metro region.

The Democratic gubernatorial primary is developing structure. The two frontrunners are Rushern Baker, a solid, foundational politician who's been immersed in Maryland politics for 25 years, and Ben Jealous, a former NAACP president who's never before held public elected office, and who is waging a progressive, bust down the door-style crusade, à la Donald Trump's campaign in 2016.

Statewide, 25% of Democratic primary voters are supporting Baker, while 23% are voting for Jealous...trailing are Montgomery State Senator Richard Madaleno at 9%; the "ticket of Kevin Kamenetz and Valerie Ervin" at 7%; former Baltimore attorney Jim Shea with 6%; Krish Vignarajah, a former White House Policy Director for Michelle Obama, with 5%; entrepreneur Alec Ross at 2%; and Ralph Jaffe and James Jones each at less than one percent; with 22% still undecided.

Geography is driving this election: Baker's ahead of Jealous in the Washington metro region (Charles, Montgomery, and Prince George's Counties), 38% to 16%, with 19% undecided, while Jealous is ahead of Baker in the Baltimore metro region (Anne Arundel, Baltimore, Harford, and Howard Counties, and Baltimore City), 28% to 17%, with 22% undecided.

The two frontrunners are tied among white Democrats, while Baker is ahead with African-American voters, 30% to 24%.

In his home county of Prince George's, Baker has a 54%-18% margin over Jealous, and a slim 23% to 22% lead over Madaleno in Montgomery County. Jealous is up on Baker in each of the five jurisdictions that encompass the Baltimore region, but the advantage is slight and the region's still up for grabs.

Madaleno is beginning to show some movement in Montgomery, which includes his senate district, while Shea's campaign seems to have gained a little spark with 17% of the vote out of Baltimore City.

With turnout in non-presidential year primaries typically 30% or less, this election will be determined, obviously, by those voters who do decide to go to the polls. The trick for the myriad campaigns over the next two weeks will be to: A) pinpoint precisely who these voters are; and B) continue trying to acquaint voters in ways that make as many as possible choose to blacken the oval to the left of their ticket's names on the paper ballot (please do not make any marks outside of the oval, and do not erase an errant mark).

General Election

Larry Hogan remains exceptionally popular in Maryland: 64% have a favorable opinion of him (37% "very favorable" and 27% "somewhat favorable"), while 12% have an unfavorable opinion of Hogan (8% "very unfavorable" and 4% "somewhat unfavorable"), 21% are neutral, and 3% do not recognize his name.

Men and women, blacks and whites, young and old, Baltimoreans, suburban Washingtonians, and rural Marylanders are all united in the positive emotion they feel for Hogan.

Further, a laudable 75% of Maryland voters approve of the job Hogan is doing as governor (41% "strongly approve" and 34% "somewhat approve"), while 17% disapprove of the job he's doing (10% "strongly disapprove" and 7% "somewhat disapprove"), with 8% offering no opinion on Hogan's performance in office.

The 11 point difference between Hogan's personal popularity (64% favorable) and his performance in office (75% approval) is attributable to the 57% of voters with a neutral opinion of Hogan who say they approve of the job he's doing.

As with his personal popularity, Hogan's job approval spans all segments and communities included in this survey. Sixty-eight percent of African-Americans and 79% of white voters; 72% of women and 79% of men; 67% of Democrats, 90% of Republicans, and 74% of independents; 76% of millennials and 77% of baby boomers...all approve of the job Hogan is doing as governor, today.

The key for Hogan is to preserve this elevated approbation through the November general election. The test for Hogan is framed by the reality that Maryland hasn't reelected a Republican governor since Theodore McKeldin in 1954, and hasn't reelected any statewide Republican since "Mac" Mathias in 1980.

Leading contender Rushern Baker is viewed favorably by 30% of Free State voters (17% "very favorable" and 13% "somewhat favorable"), while 7% have an unfavorable opinion of Baker (3% "very unfavorable" and 4% "somewhat unfavorable"), 23% are neutral, and 40% do not recognize his name.

Baker, Prince George's County Executive, is best known in the Washington metro region, where 48% have a favorable opinion of him.

Twenty-seven percent have a favorable opinion of the other frontrunner, Ben Jealous (11% "very favorable" and 16% "somewhat favorable"), while 14% have an unfavorable opinion of Jealous (9% "very unfavorable" and 5% "somewhat unfavorable"), 23% are neutral, and 36% do not recognize his name.

Montgomery State Senator Richard Madaleno has a 15% favorable rating (9% "very favorable" and 6% "somewhat favorable"), while 4% have an unfavorable opinion of Madaleno (3% "very unfavorable" and 1% "somewhat unfavorable"), 18% are neutral, and 63% don't recognize his name.

As mentioned earlier, President Trump looms large over this year's election in Maryland. Statewide, 37% approve of the job Trump is doing in the White House (27% "strongly approve" and 10% "somewhat approve"), while a full throttle 60% disapprove of the job Trump is doing as president (49% "strongly disapprove" and 11% "somewhat disapprove"), with 3% providing no opinion.

Governor Hogan leads each of his possible general election opponents by double-digit margins, with Rushern Baker keeping it most competitive...and the PG Executive holds Hogan farthest from the fifty percent threshold, which is the critical polling number for any incumbent seeking reelection.

Statewide, 48% of November voters say they would vote for Republican Hogan “if the election were held today,” while 37% say they’d vote for Baker, the Democrat, and 15% are undecided.

Hogan is up 54% to 33% among men, and has a slim 42%-40% margin with women. Hogan’s currently capturing 57% of the white vote and 27% of the black vote.

Among Republicans, the governor’s capturing 81% of the vote, and is getting 54% of those affiliated with neither party. Among Democrats, the incumbent’s a hair’s breadth under 30% vote support, which is the “magic” number for a Republican in deep-blue Maryland.

Hogan’s stratospheric popularity and approval create something of a political illusion. The reality is that while 67% of Democrats “**approve**” of the job Hogan is doing as governor, only 41% of this 67% say they are actually going to **vote** for Hogan, the Republican, for reelection in the November election.

Against Jealous, Hogan leads 52% to 34%, with 14% undecided. In this matchup, Hogan moves up a tad in metro Baltimore, but the chief difference compared to Hogan-Baker is found in metro Washington. Hogan trails Jealous by a comparatively small 12 points in the D.C. suburbs (35%-47%), contrasted with being down by 25 points to Baker in the D.C. suburbs, 30% to 55%.

Jealous’ softness in the D.C. region is thus: there is a hypothetical plurality preference for Hogan (R) over Jealous (D) currently in Montgomery County. Nobody should be under the delusion that Hogan will win Montgomery Co. in November (even vs Jealous), but in a close election, every vote is going to count.

In a matchup with Madaleno, Hogan leads 50% to 36%, with 14% undecided. Madaleno is besting Hogan in Montgomery County by a margin of 55% to 30%.

Maryland voters, overall, appear to be relatively contented. Sixty-two percent say that things in the state are moving in the right direction, while 24% think things are off riding the wrong track, with 14% offering no response.

Statewide, a 41% plurality favor legalizing commercial sports betting (16% “strongly favor” and 25% “somewhat favor”), while 38% oppose commercial sports betting (28% “strongly oppose” and 10% “somewhat oppose”), with 21% not sure.

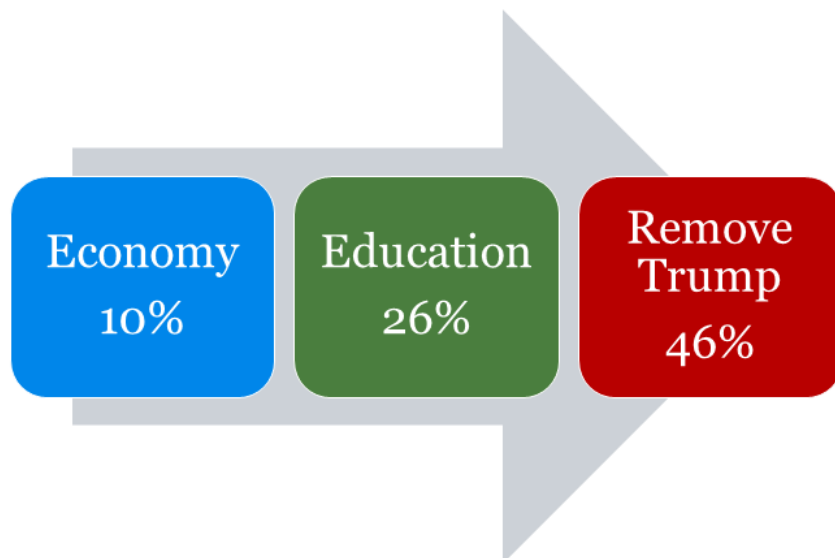

Results Overview

Democratic Primary

Among Maryland Democrats who are going to vote in this month's election, 46% say that "removing Donald Trump from office" is the most important issue for them in the primary. This is followed by "public education (26%), "the economy and jobs (10%), "crime, public safety & law enforcement" (8%), and "the opioid epidemic" (3%).

A majority of voters between the ages 35-54 say that removing Trump is the number one issue for them (51%), as do 50% of African-Americans and 52% of voters in the Washington metro region.

#1 Issue for June Democratic Primary Voters

Removing Donald Trump from the oval office was the most frequently picked *prime motivation* response within each and every demographic group included in this survey of Maryland Democratic primary voters.

As it rolls toward Thursday's commencement of early voting, the Democratic gubernatorial primary is developing structure. The two frontrunners are Rushern Baker, a steady, foundational politician who's been immersed in Maryland politics for 25 years, and Ben Jealous, a former NAACP president who's never before held public elected office, and who is waging a progressive, bust down the door-style crusade, à la Donald Trump's campaign in 2016.

Statewide, 25% of Democratic primary voters are supporting Baker, while 23% are voting for Jealous...trailing are Montgomery State Senator Richard Madaleno, backed by 9%; the "ticket of Kevin Kamenetz and Valerie Ervin" captures 7%; former Baltimore attorney Jim Shea receives 6%; Krish Vignarajah, a former White House Policy Director for Michelle Obama, garners 5%; entrepreneur Alec Ross has 2%; Ralph Jaffe and James Jones each receive less than 1%; and 22% are undecided.

Geography is the defining dynamic informing this contest, which earns the winner the privilege of challenging a popular GOP governor of a blue state. Baker is ahead of Jealous in the Washington metro region (Charles, Montgomery, and Prince George's Counties), 38% to 16%, with 19% undecided, while Jealous is up over Baker in the Baltimore metro region (Anne Arundel, Baltimore, Harford, and Howard Counties, and Baltimore City), 28% to 17%, with 22% undecided.

In rural Maryland, which comprises less than fifteen percent of the Democratic primary electorate, Jealous leads Baker 24%-11%, with 30% undecided.

The two leaders are tied among white Democrats, while Baker is ahead with African-American voters, 30% to 24%.

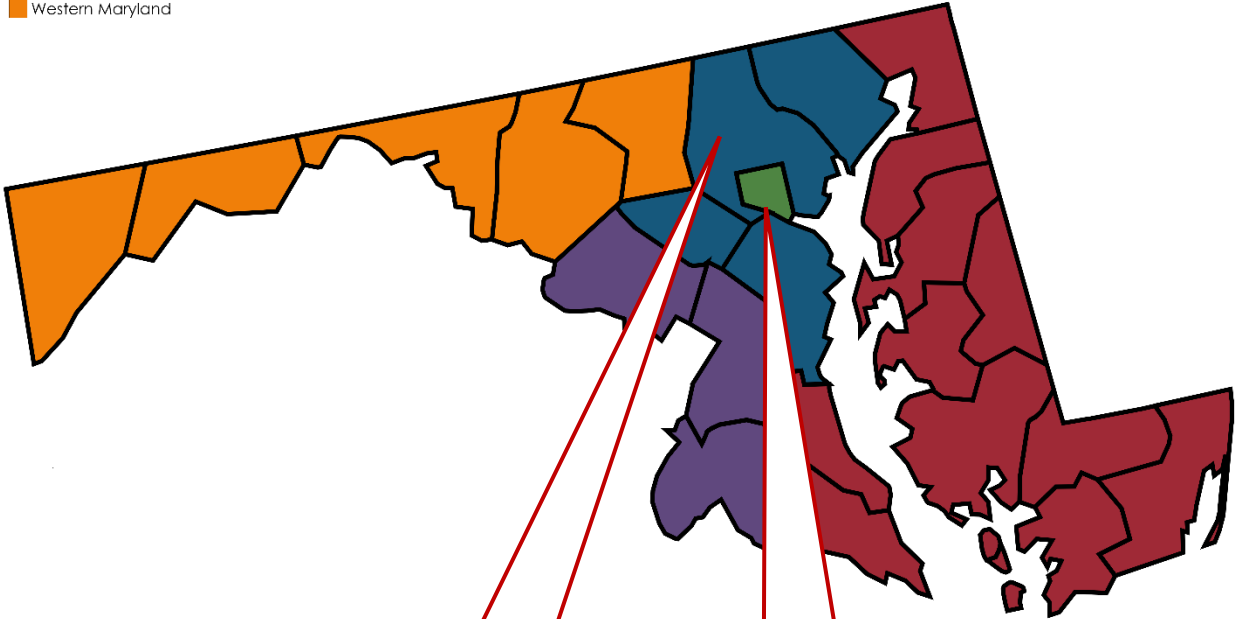

In his home county of Prince George's, Baker has a 54%-18% margin over Jealous, and a slim 23% to 22% lead over Madaleno in Montgomery County. Jealous is up on Baker in each of the five jurisdictions that encompass the Baltimore region, but the advantage is slight and the region's still up for grabs.

Madaleno is beginning to show some movement in Montgomery, which includes his senate district, while Shea's campaign is exhibiting some energy by snaring 17% of the vote out of Baltimore City.

With primary turnout in non-presidential years typically 30% or less here in the state, this election will be determined by those voters who do end up at the polls, and by which candidate best bonds with these constituents over the next two weeks as voters color in the oval marking their gubernatorial selection.

Prince George's County	
Baker	54%
Jealous	18%
Madaleno	3%

General Election

Larry Hogan remains extremely popular among Old Line State voters. Sixty-four percent have a favorable opinion of him (37% “very favorable” and 27% “somewhat favorable”), while 12% have an unfavorable opinion of Hogan (8% “very unfavorable” and 4% “somewhat unfavorable”), 21% are neutral, and 3% do not recognize his name.

Men and women, blacks and whites, young and old, Baltimoreans, suburban Washingtonians, and rural Marylanders are united in the positive feeling they have for Hogan.

Further, a creditable 75% of Maryland voters approve of the job Hogan is doing as governor (41% “strongly approve” and 34% “somewhat approve”), while 17% disapprove of the job he’s doing (10% “strongly disapprove” and 7% “somewhat disapprove”), with 8% offering no opinion on Hogan’s performance in office.

The 11 point difference between Hogan’s personal popularity (64% favorable) and performance in office (75% approval) is attributable to the 57% of voters with a neutral opinion of Hogan who say they approve of the job he’s doing.

As with his personal popularity, Hogan’s job approval spans all blocs and fellowships. Sixty-eight percent of African-Americans and 79% of white voters; 72% of women and 79% of men; 67% of Democrats, 90% of Republicans, and 74% of independents; 76% of millennials and 77% of baby boomers...all approve of the job Hogan is doing as governor, today.

The fundamental for him will be the ability to sustain this approbation through November 6th. The challenge for him is that Maryland hasn’t reelected a Republican governor since Theodore McKeldin in 1954, and hasn’t reelected any statewide GOPer since “Mac” Mathias in 1980.

Leading contender Rushern Baker is viewed favorably by 30% of Free State voters (17% “very favorable” and 13% “somewhat favorable”), while 7% have an unfavorable opinion of Baker (3% “very unfavorable” and 4% “somewhat unfavorable”), 23% are neutral, and 40% do not recognize his name.

Baker, Prince George’s County Executive, is best known in the Washington metro region, where 48% have a favorable opinion of him.

Other frontrunner Ben Jealous has 27% of Marylanders with a favorable opinion of him (11% “very favorable” and 16% “somewhat favorable”), while 14% have an unfavorable

opinion of Jealous (9% “very unfavorable” and 5% “somewhat unfavorable”), 23% are neutral, and 36% do not recognize his name.

Montgomery State Senator Richard Madaleno has a 15% favorable rating (9% “very favorable” and 6% “somewhat favorable”), while 4% have an unfavorable opinion of Madaleno (3% “very unfavorable” and 1% “somewhat unfavorable”), 18% are neutral, and 63% don’t recognize his name.

President Donald Trump’s flamboyant personality looms large (huge?) over Maryland elections this year. Statewide, 37% approve of the job Trump is doing in the White House (27% “strongly approve” and 10% “somewhat approve”), while a full throttle 60% disapprove of the job Trump is doing as president (49% “strongly disapprove” and 11% “somewhat disapprove”), with 3% providing no opinion.

Additionally, as mentioned earlier, 46% of Democrats say sending the president packing back to Trump Towers in NYC is sine qua non...the mere thought of the prospect of evicting Trump from 1600 Pennsylvania Avenue seems, for many of us, to induce euphoria, and the possibility of his impeachment and conviction provides essential political nourishment in a world that gives so little, so rarely.

Governor Hogan leads each of his possible general election opponents by double-digit margins, with Rushern Baker keeping it most competitive...and the PG Executive keeps Hogan farthest away from the fifty percent threshold, which is the critical polling number for any incumbent seeking reelection.

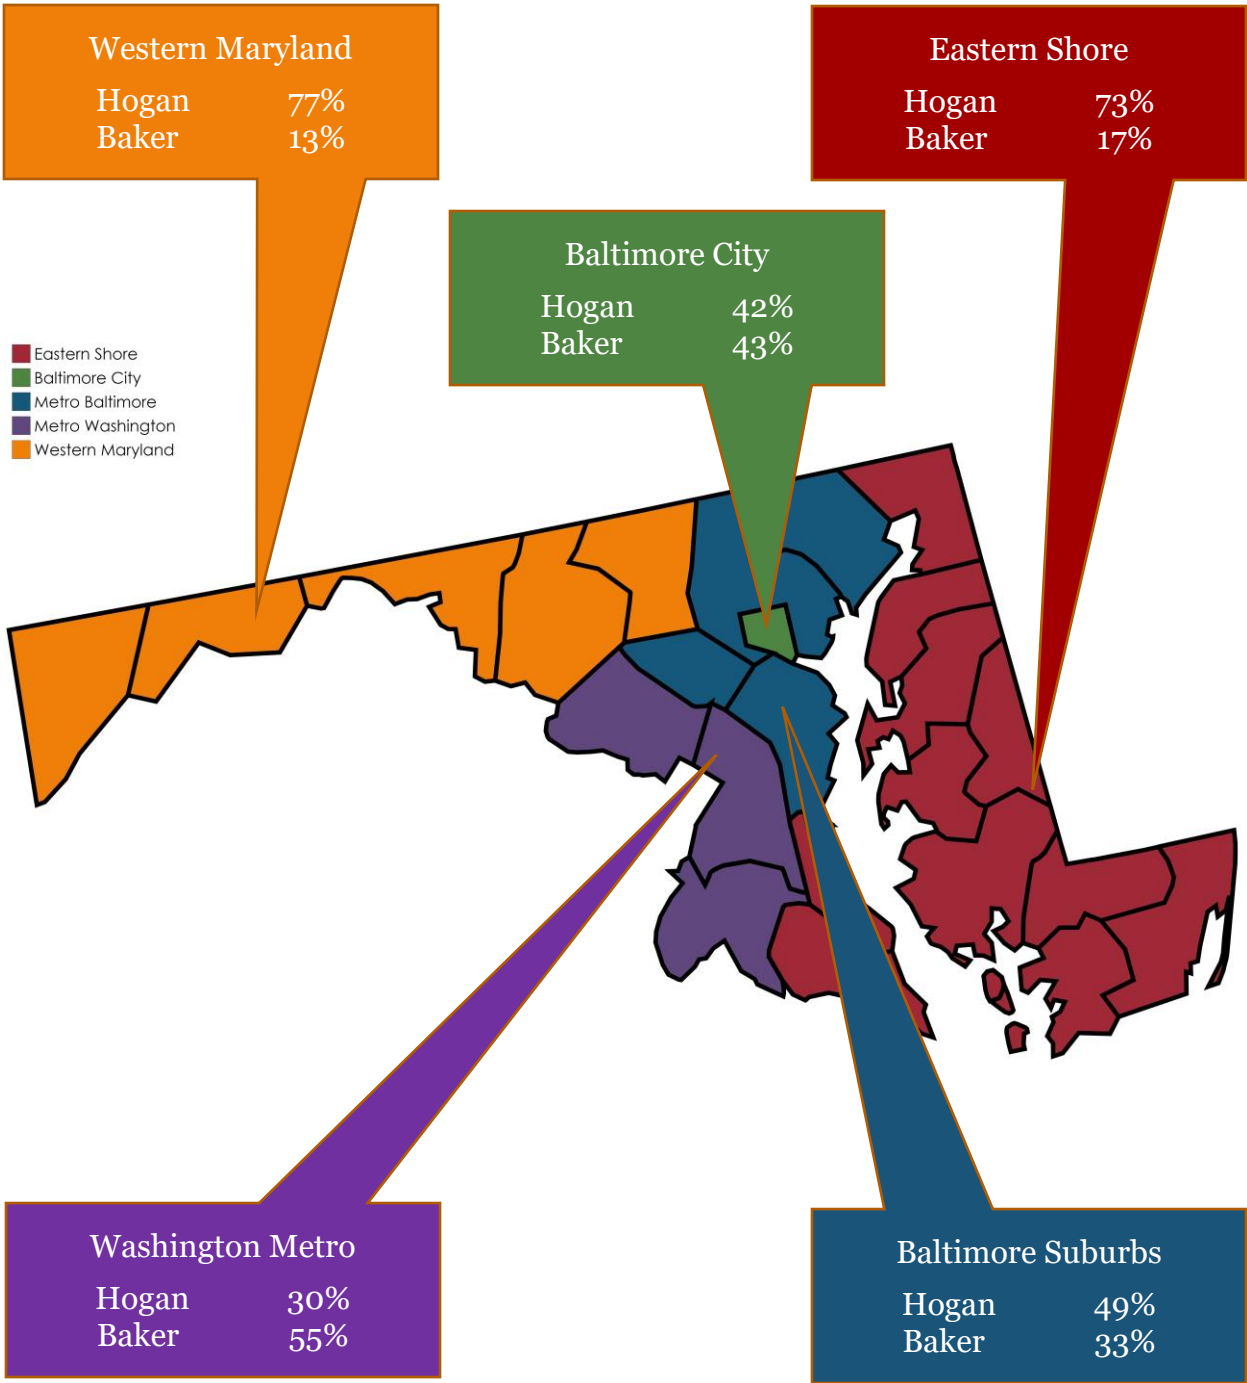

Statewide, 48% of November voters say they would vote for Republican Hogan “if the election were held today,” 37% say they’d vote for Baker, the Democrat, and 15% are undecided.

Hogan is up 54% to 33% among men, and has a slim 42%-40% margin with women. Hogan’s currently capturing 57% of the white vote and 27% of the black vote.

Among Republicans, the governor’s capturing 81% of the vote, and is getting 54% of those unaffiliated with either party. Among Democrats, the incumbent’s a hair’s breadth under 30% vote support, which is the “magic” number for a Republican in deep-blue Maryland.

Hogan’s stratospheric popularity and approval create a chimera, a political “snatch the pebble from my hand.” The reality is that, yes, 67% of Democrats “**approve**” of the governor, but only 41% of this group say they are going to **vote** for the GOP incumbent.

November 2018 Maryland Gubernatorial Election

Against Jealous, Hogan captures 52%, compared to 34% for Jealous, with 14% undecided. In this matchup, Hogan bumps up a tad in metro Baltimore, but the chief difference compared to Hogan-Baker is in metro Washington. Hogan trails Jealous by a relatively scant 12 points there (35% to 47%), contrasted with Hogan being down by a decisive 25 points matched against Baker in the D.C. suburbs (30% to 55%).

Jealous' softness in the region is illustrated by the slender plurality preference for the incumbent currently in Montgomery County. Nobody should be under the delusion Hogan can carry MoCo in November, but in a tight election, every vote is going to count.

In a match-up with Madaleno, Hogan leads 50% to 36%, with 14% undecided. Madaleno is besting Hogan in Montgomery County by a margin of 55% to 30%.

Maryland voters, overall, appear to be reasonably contented. Sixty-two percent say that things in the state are moving in the right direction, while 24% think things are off riding the wrong track, with 14% being...how would the French say it... indifférent, or at least offering no response.

Many here in the state are pretty happy with the direction of things, but Republicans (79%), white voters (71%), and voters in the rural areas (76%) are most exuberant with the way things are going in Maryland.

Voters are divided on their attitude toward legalizing commercial sports betting in Maryland, which a recent Supreme Court ruling opened the door for, allowing individual states to do so, if they choose. Statewide, a 41% plurality favor legalizing commercial sports betting (16% "strongly favor" and 25% "somewhat favor"), while 38% oppose commercial sports betting (28% "strongly oppose" and 10% "somewhat oppose"), with 21% not sure.

Forty-six percent of Democrats favor legalizing sports betting in the Free State, while 43% of Republicans oppose it.
